

LANDMARK STAFFING

Position: Professional Engineer

Location: Grand Junction, CO

In person - possible part time work from home

Type: Full Time

8 Hours - Monday - Friday

Wage: \$83,200 - \$93,600/ year

About Us: WestWater Engineering was founded in 1979 to provide planning and design services for water and wastewater systems. Growing and diversified client needs led to the development of expertise in related fields of environmental science. The ability to fully integrate engineering design and environmental resources allows us to carry a project from conceptual planning to construction. Our ability to work as a project team with other consultants, regulatory and funding agencies, and clients allows us to achieve project goals in a timely and cost-effective manner. As a consulting firm, our objective is to provide a cost-effective and efficient service for our clients while demonstrating a high level of competence and professionalism.

Westwater Engineering has earned a reputation for quality products and client-focused orientation during the firm's more than 40 years of business. The professional staff has developed good working relationships with regulatory agencies involved in project permitting, and we are proud of our ability to provide effective project coordination and communication. As residents of the Western Slope, our knowledge of local concerns and priorities often helps us identify and address issues before becoming project obstacles.

Job Duties:

- Conduct site investigations and surveys to gather data for engineering projects
- Perform calculations and analysis for engineering designs
- Prepare engineering drawings, plans, and specifications using AutoCAD Civil 3D and supporting software
- Collaborate with architects, contractors, and other professionals to ensure project success
